Vacuum Event Toilets

3 Pan GA (general admission)

Splashdown QLD introduces Australia's first general admission vacuum event toilets. Environmentally friendly and with improved hygiene, these toilets will add prestige and profitability to your event.

Why use vacuum event toilets?

Customer satisfaction improves protability

- Cleaner toilets improve food and beverage sales
- Patrons have no need to find alternatives or shorten their time at the event
- Allows promoters to demand premium prices in VIP areas, and food and beverage areas
- Unlimited waste capacity when connected to sewer
- Hand wash facilities separated to speed up time in the cubicles as well as reducing water spillage
- Waste management is away from patrons for improved safety
- No service trucks in public areas
- No odour

Environmental advantages

- Use of air with minimum amounts of water (600ml) to move waste – reducing waste total by up to 80%
- Negates the use of trucks and diesel by ability to connect directly to sewer
- Reduces waste treatment times with primary treatment done by the vacuum process
- Better sanitary results by improving hygiene
- Efficient transport system with units being able to fold and stack, reducing transport costs
- No chemicals

Flexible configuration

- 3 pan configuration allows for small to large groupings of units
- Ability to operate on uneven ground, and in complicated layouts

Patent: 2013902105

Reliable performance

Splashdown QLD along with Splashdown Event Services is Australia's industry leader in providing innovative event products and services. Our units are designed using years of proven European marine technology which has been adapted to the event industry. This technology is used worldwide in luxury and military ships, buildings and sporting venues.

In the Australian Event Awards 2012, Splashdown Event Services were winners in the category of **Best Product or Service**. Some of the judges' comments included:

“ The 'Bespoke Luxury Bathroom Module' – is satisfying a basic human need at events in an impressively improved manner. This product is the result of years of experience, and careful domestic and international research. It combines the latest technology with elegant design to provide an outstanding new service. ”

“ Classy and stylish way to enhance the necessary need for amenities at public/private events. Great use of colour and design which provides the added level of bathroom comfort. ”

Award winning bespoke units
