

THE LEADING GLOBAL SUPPLIER OF

# PORTABLE SANITATION EQUIPMENT & INFRASTRUCTURE

*Queensland*  
AUSTRALIA

Version 6.5 Q

## Introduction

With over 35 years experience in the events industry, Splashdown reaches broader audiences and is setting new sanitation standards to major international events. We are a leading global supplier of portable sanitation and infrastructure for hire.

Having served well over 5,000 events, we have great expertise in ensuring clients have the appropriate facilities. With a large range of hire options, Splashdown is primarily focused on providing

sustainable sanitation equipment to major sports and large multi day events in general. Our products are equipped with vacuum technology and have raised the bar on event facilities delivery, bringing a new concept to event operations.

In addition to standard portable toilets and bespoke luxury bathroom modules for hire, we offer a range of other services including Event Management, Planning and Consultancy, to streamline event's operations and provide a smooth experience to clients and patrons. Still, the best part of doing business with Splashdown isn't the frills and fancy design; it's the in depth knowledge of the large events industry, the reliable customer service with a smile, and about striving for unprecedented levels of customer service breaking new boundaries in water savings and waste minimization working with the most environmentally friendly & efficient toilet pans in the world to create new paradigms in sustainability.

We're here to help make one of the less glamorous aspects of event planning as simple and seamless as possible.

**RICHARD CAVE, GROUP DIRECTOR**

## 2018 Commonwealth Games

**Splashdown's most significant contract to date was achieved with the successful bid to be the sole provider of toilets to the 2018 Commonwealth Games in Australia.**

Splashdown knows that the vacuum systems greatly benefit International Events beyond expectation and offer the audience the best experience when compared to the standard event industry convention sanitation systems.

Splashdown used the latest sustainable equipment in the world at the 2018 Commonwealth Games in Australia to meet the sanitation needs of:

- 6,600 athletes
- 15,500 volunteers
- 1.2 million ticket holders

WELS 6 Star rated vacuum toilets and the latest water saving device enabled a saving of over 80% in water usage and reduced the levels of wastewater collection and disposal by 87% compared to the use of traditional toilet systems.

**Estimated saving of 4,833,967 litres across the entire event\***

\*Estimates based on traditional toilet using 6 litres per flush and vacuum toilet using 0.35 litres per flush.

## Letter of Recommendation

The Gold Coast 2018 Commonwealth Games (GC2018) welcomed more than 6,600 athletes and team officials from 71 Commonwealth nations and territories to the Gold Coast and event cities Brisbane, Cairns and Townsville to share in the celebration of sport, entertainment and culture.

GC2018 is the biggest sporting event staged in Australia this decade. It featured the largest integrated sports program in Commonwealth Games history, comprising 18 sports and seven para-sports.

Splashdown Queensland (Splashdown) was contracted to supply the toilets, showers, and the water and waste water overlay plumbing infrastructure for the GC2018 competition venues and the Commonwealth Games Village. This also involved the management and coordination of waste water collection and its disposal, and water quality management.

One highlight of the services supplied was the vacuum toilet system which offers significant sustainable and environmental advantages including large scale water savings, and consequently the reduced amount of waste water collection and disposal that is required.

GOLDOC is the first Games organising committee in history to commit to such a modern and sustainable sanitation solution, and we are extremely pleased with the results.

Splashdown's experience and technical advice were invaluable during the planning and design stages of sanitation areas, significantly increasing the level of amenity for Games patrons.

Splashdown proved to be flexible and was on time with key milestones including meeting handovers under challenging timeframes, and attaining the high levels of compliance that the event required.

During the competition period Splashdown provided a superior level of service. The staff were conscientious and responsive in dealing with the few minor and to be expected issues that arose, thus enhancing visitor satisfaction.

Splashdown's competence and innovation resulted in the significant environmental benefits relating to water use minimisation being realised for the event and the Gold Coast. I would like to congratulate Splashdown on the professional and innovative way that it performed its services for GOLDOC at the Gold Coast 2018 Commonwealth Games in Australia. Well done!

Yours truly

## Australian PGA Championship

Having served well over 5,000 events, we have great expertise in ensuring clients have the appropriate facilities. With a large range of hire options, Splashdown is primarily focused on providing sustainable sanitation equipment to major sports events and large multi day events.

The Australian PGS Championship is a tournament on the PGA Tour of Australasia. It is the home of the Australian PGA and dates back to 1905. Since 2000 it has been held in the South East Queensland region.

Splashdown is proud to be a regular provider of this special event with our VIP combination (male / female), Connect 6 Unit, 16 Pan building and single portable toilets.

## CONNECT 3 Toilets

Our products are equipped with vacuum technology and have raised the bar on event facilities delivery, bringing a new concept to event operations.

Modern and ergonomic design with 3 individual cubicles made with medical grade materials.

Features include soft ambient lighting, digital occupancy indication lights and our unique 6 Star WELS rating vacuum toilet. (Specification W:2250mm x D:1180mm x H:2174mm)

# SPLASHdown CONNECT 4U Urinal

**Modern and ergonomic design with 4 individual cubicles with private entrances and changing areas.**

Features include integrated seating, hooks and partitioned changing area in each cubicle. The showers are designed for minimal water consumption. (W:2227 x D:1180 x H:2295)

## CONNECT Ambulant

**Splashdown took the initiative to introduce the provision of portable amenities to meet the needs for people with ambulant disabilities**

Features include our 6 star WELS rated toilet, a baby changing unit, a compact footprint and technology to meet our ISO20121 sustainability targets.

(W:2262mm x D:1190mm x H:2250mm)

## CONNECT Accessible

**Splashdown's accessible toilet and shower unit combines the trademark modern and sleek design of the CONNECT range along with practical installation and transportation requirements.**

Features include our 6 star WELS rated vacuum toilet, an accessible shower, a compact footprint and technology to meet our ISO20121 sustainability targets.

(W:2900mm x D:2200mm x H:2200mm)

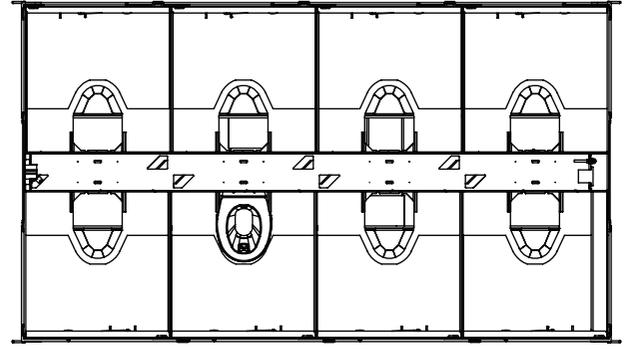

## CONNECT 6 Toilets

**Modern and ergonomic design with 6 individual cubicles made with medical grade materials.**

Features include soft ambient lighting, digital occupancy indication lights

(Specification W:2900mm x D:2200mm x H:2130mm)

## CONNECT 8 Toilets

**Modern and ergonomical design with 8 individual cubicles ideal for general admission areas, made with medical grade materials and designed with minimal cleaning and maintenance in mind.**

Features include: soft ambient lighting and digital occupancy lighting

(W:3900mm x D:2200mm x H:2130mm)

## CONNECT 15U Urinal

**Modern and ergonomical design with 15 individual spaces ideal for general admission areas, made with medical grade materials and designed with minimal cleaning and maintenance in mind.**

Features include: soft ambient lighting, splash floor for simple cleaning and air extraction system.

(W:3900mm x D:2200mm x H:2130mm)

A connect 8 and a urinal 15 unit placed in combination, naturally creates a new option for clients by replacing a traditional 16 pan unit and now providing 23 sanitation positions in a similar ground footprint.

**CONNECT** Vanity

**Splashdown's vanity unit combines the trademark modern and sleek design of the CONNECT range along with practical installation and transportation requirements.**

Features include a concealed Dyson hand dryer, touchless soap dispensers, sensor taps, a large mirror, ambient lighting and a compact, foldable design for easy transportation.

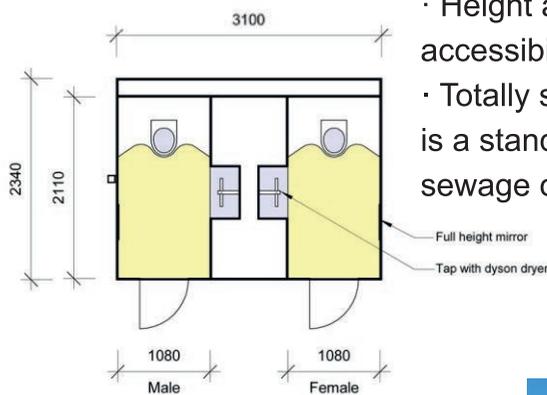

## DUO Gold Toilet Trailer

• **Dimensions:** 2.66m(H) x 2.33(W) x 3.17m(L)

**Features:**

- Indicate occupancy lights
- Sensor activated Dyson tap system and sensor activated flush
- Our Duo unit caters for approximately 100 guests (depending on event type).
- Ladies & Gentleman's facilities
- Fully Air Conditioned for your comfort.
- Height adjustable suspension for improved accessibility.
- Totally self-contained units, all that is required is a standard 240V electricity supply. No sewage or mains water connection is needed.

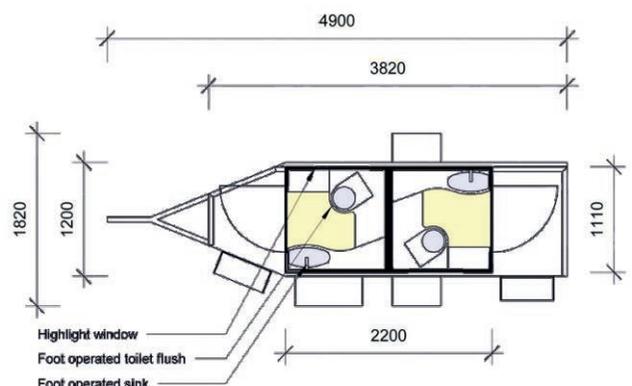

## DUO Twin Toilet Trailer

**Dimensions:** 3.1m(H) x 2.2m(W) x 4.8m(L)

**Features:**

- Our Duo unit caters for approximately 100 guests (depending on event type).
- Ladies & Gentlemans facilities
- Fully Air Conditioned for your Comfort.
- Totally self-contained units, all that is required is a standard 240V electricity supply. No sewage or mains water connection is needed.
- Health and safety is a priority. All our units are fitted with slip-resistant flooring and non-slip access steps with hand rails.
- Internal & external LED lighting

**INTRODUCING

**Dimensions:**

# SPLASHdown **CONNECT** 4 Showers

**Modern and ergonomic design with 4 individual cubicles with private entrances and changing areas.**

Features include integrated seating, hooks and partitioned changing area in each cubicle. The showers are designed for minimal water consumption. (W:3000mm x D:2250mm x H:2130mm)

### PICNIC TABLES FOR EVENTS

These picnic-style folding tables are designed to seat a maximum of eight average sized adults.

lots to offer as professional seating:

- Simple, strong and safe design
- Stable on all surfaces – even on wet grass
- Seats eight average sized adults
- Easy access with comfortable seating
- Elegant design, attractive colour
- Wheelchair-friendly
- Easy to assemble
- Easy to clean
- Wide enough for two plates

#### specifications:

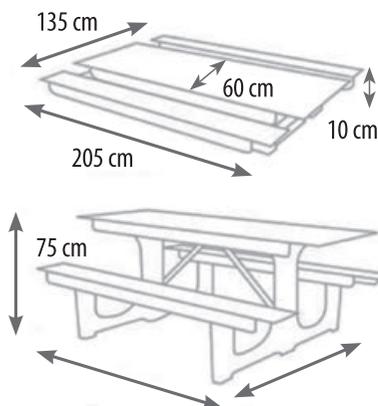

The table's width and length remain the same when set up or taken down.

The benches are 5cm shorter than the table top, which ensures that the cheeks don't get stuck if the tables are connected lengthways.

If necessary the table can be easily dismantled, splitting the unit into five separate parts for transport.

<b>L x W</b>	200 x 135 cm
<b>Table top</b>	205 x 60 cm
<b>Bench</b>	200 x 24 cm
<b>Table top height</b>	75 cm
<b>Bench height</b>	45 cm
<b>Stacking height</b>	10 cm
<b>Weight</b>	ca. 45 kg

# SPLASHdown Water Stations

**Specially designed hydration stations for large events where access to fresh water for patrons is required. Units range from 12 to 36 drinking fountains and can be hooked to remote tanks or town water supply.**

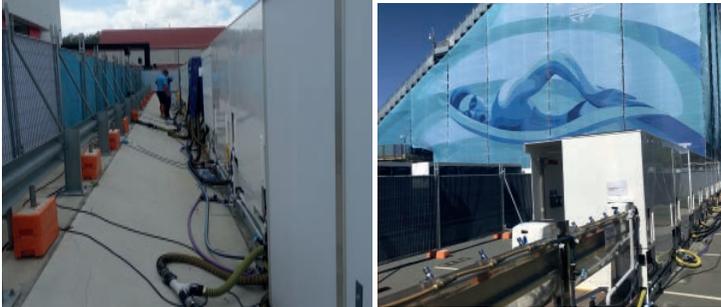

We have a variety of units to suit all your needs including bubbler and tap combination units, bottle filling stands, hydration trailers with holding tanks along with the option of connecting to mains supplies or remote tanks with most units.

## WATER INFRASTRUCTURE AND EVENT PLUMBING

**Splashdown events can install a temporary water infrastructure for your event large or small.**

Our specialist team, headed by staff whom have major event experience from events such as The London 2012 Olympic Games & The Commonwealth Games 2018 will ensure that whatever you need, from a simple hand wash unit to banks of full flushing toilets, the water will arrive at the correct pressure and quality expected.

### Potable water on demand.

Using our innovative flexi tank system and booster pumps we can deliver a variable rate supply to match the event demand, from a standalone anti tamper storage tank to larger capacity storage options.

### Grey and effluent waste water

Once we have created and agreed a plan with the organisers, we are able to pump to either storage, the main sewer, or simply arrange tankering. At peak times waste can be held, and disposed of at a later time to help sewers and infrastructure.

For hard pushed sewer systems we can incorporate the use of Vacuum Toilets to minimise the pressure on local utilities.

### Storage Equipment

- Potable water storage from 1,000 litres to 50,000 litres
- Potable 2,500 litre lockable anti-tamper bowser.
- Grey waste, low profile, standard tanks and high capacity 25,000 and 50,000 litre Bladder tanks.

## DRY HIRE WATER TRUCKS

## CAR LICENCE WATERCARTS

Includes insurances, high visual tape in yellow, fully baffled tank, high pressure 2 inch pump, options for water hose, in cabin pump controls, outlet for garden hose, fire extinguisher, air conditioning, adjustable sprayers for rear and sides and a dripper.

## TRUCK LICENCE WATERCARTS

Includes powerful turbo diesel light rigid truck, insurances, beacon, baffled tank, high pressure pump, 20 meters of hose and air conditioning.

## TRAILER MOUNT WATERCARTS & BOWSERS

Gerni Style or Potable Water Transport  
Includes insurances, fully baffled tank, high pressure 2 inch pump, 20 metres of hose on reel and a single or dual rear adjustable sprayer.
